**SPORTS MEDICINE &
ATHLETIC TRAINING**

What's this all about?

WE WANT YOU!

Working Football

Students interested in becoming an Athletic Training Student Aid and joining the Sports Medicine Program MUST attend football practices starting in August. The report date is August 8 in the field house athletic training room at 8am. We will have a meeting before then. Being in our program is a commitment similar to playing sports, requiring after school practices and attending games.

The Class

In Athletic Training classes we teach basic taping, anatomy, medical terminology, CPR, etc. This is a great class for anyone interested in pursuing a career in a medical field and counts as a PE credit. If you are interested in having Athletic Training on your schedule email Coach Joseph, Coach Serna, or Coach Pigg so they can give the counselors approval. You must be enrolled in the class (4th or 8th Block) to be in the Sports Medicine Program and assist with athletics.

What to Expect

Wear a t-shirt, shorts, and athletic shoes. All clothing must be dress code appropriate and comfortable. We will spend several hours outside at football practice each day, providing water and first aid for all of the athletes on the field. Bring sunscreen! You must have a physical on file dated after April 1, 2022!
